GREEN VALLEY EDUCATIONAL INSTITUTE

DEPARTMENT OF INFORMATION & COMMUNICATION TECHNOLOGY (ICT)

DEPARTMENT PROFILE & ANNUAL ACTION PLAN (2026–2027)

Submitted by: Mr. Mehraj U Din Mir (HOD – ICT)	**Designation:** Head of Department – ICT
Submitted to: School Academic Leadership	**Academic Session:** 2026–2027 | Status: Approved

1. Department Profile

The ICT Department at Green Valley Educational Institute is responsible for the systematic delivery of computer education, information technology, computational thinking, programming, age-appropriate artificial intelligence education, and practical digital skills across all applicable school levels.

The department follows a structured approach to curriculum implementation, lesson planning, practical learning, assessment, student project work, laboratory utilisation, educator coordination, and continuous academic improvement. Its focus is to ensure that students develop conceptual understanding alongside the ability to apply their learning through practical activities, digital creation, problem-solving, and innovation.

Furthermore, the department actively supports the appropriate integration of technology into teaching and learning, the continuous professional development of ICT educators, the effective utilization of digital learning platforms, and the high-standard maintenance of functional computer laboratories.

Departmental Scope & Core Responsibilities

- **Academic Delivery:** Computer Science, ICT, and applicable AI-related curriculum across Levels I–XII, strictly adhering to the approved syllabus for each respective level.
- **Practical Learning:** Guided laboratory activities, hands-on programming, computational thinking drills, digital productivity mastery, and structured project-based learning.
- **Assessment & Evaluation:** Continuous theory and practical assessments, granular student performance analytics, regular feedback mechanisms, and diagnostic identification of learning gaps.
- **Innovation & Enrichment:** AI literacy programs, coding initiatives, real-world student projects, technology-based enrichment drives, and the institutional AI & Innovation Club.
- **Academic Coordination:** Standardized lesson planning, systematic curriculum tracking, structured classroom observations, inter-educator collaboration, and comprehensive periodic reporting.
- **Infrastructure & Platforms:** Computer laboratory readiness, preventive equipment maintenance, updated software availability, and swift technical coordination for digital learning platforms.

2. Departmental Vision

> **OUR VISION STATEMENT**
> *"To develop digitally competent, responsible, creative, and problem-solving learners through structured computer education, meaningful practical experiences, appropriate AI integration, and continuous improvement in teaching and learning."*

3. Departmental Mission

The ICT Department aims to execute its strategic objectives through eight foundational mission pillars:

3.1 Ensure planned, systematic, and curriculum-aligned teaching across all assigned school levels.

3.2 Seamlessly connect theoretical concepts with hands-on practical application and student-created work.

3.3 Strengthen computational thinking, coding skills, digital literacy, and age-appropriate artificial intelligence understanding.

3.4 Improve the quality of classroom instruction through effective lesson planning, innovative pedagogy, and formative assessment.

3.5 Monitor student learning outcomes rigorously and implement targeted remediation wherever learning gaps are identified.

3.6 Develop educator capacity through regular professional learning, collaborative planning, and reflective teaching practices.

3.7 Maintain effective laboratory utilisation and coordinate timely resolution of all technical and digital-learning challenges.

3.8 Provide transparent, evidence-based documentation of departmental progress, achievements, challenges, and improvement actions.

4. Departmental Operating Framework

The department operates through a cohesive matrix of connected academic and operational systems designed to ensure end-to-end accountability and excellence.

Operating System	Departmental Responsibility & Governance
Curriculum Management	Approved syllabus, level-wise annual planning, and syllabus-progress tracking.
Pedagogical Planning	Annual and term-wise schemes, detailed lesson plans, and practical-learning activities.
Classroom Implementation	Student engagement, competency development, and appropriate technology integration.
Assessment & Feedback	Theory/practical assessments, rubrics, granular performance analysis, and follow-up support.
Student Learning Evidence	Notebooks, practical files, coding projects, digital portfolios, and demonstrated competencies.
Educator Development	Targeted training, peer collaboration, reflective practice, and improvement action planning.
Laboratory Management	Lab utilisation, asset inventory, system health monitoring, and technical fault resolution.
Innovation & Enrichment	AI & Innovation Club, hackathons, student coding projects, workshops, and competitions.
Departmental Review	Periodic reviews, formal minutes, action-item tracking, and evidence-based corrective plans.

These systems are strictly interdependent: curriculum planning guides classroom delivery; assessment informs pedagogical adjustments; student work validates mastery; and departmental reviews identify institutional enhancements.

5. Annual Objectives and Measurable Targets

The following targets constitute the department's action framework for the 2026–2027 academic session. Progress is verified against authentic records and school timelines.

Priority Area	Annual Measurable Target	Evidence of Completion
Curriculum Implementation	Maintain a current progress record for every assigned class/level and achieve 100% timely syllabus completion.	Class-wise syllabus tracker and review records
Academic Planning	Maintain approved annual/term schemes and updated, dated lesson plans for all scheduled teaching.	Approved schemes and dated lesson-plan logs
Practical Learning	Deliver all prescribed practical activities, hands-on lab sessions, and student projects per syllabus.	Lab logbooks, student code files, and project repositories
Assessment & Feedback	Conduct rigorous formative/summative tests and complete performance analysis post-assessments.	Standardized question papers, rubrics, and marks records
Learning Support	Identify documented learning gaps and implement targeted diagnostic follow-up measures.	Assessment analysis logs and remediation intervention sheets
Teaching Quality	Strengthen hands-on, competency-based, and project-based student-centred instructional models.	Lesson plans, classroom observations, and student outputs
Educator Development	Identify pedagogical/technical training needs, share best practices, and track PD action points.	Training attendance records, reflections, and action plans
Laboratory Readiness	Maintain lab logs, monitor hardware/software health, log fault tickets, and ensure high system uptime.	Inventory ledgers, lab checklists, and maintenance logs
Digital Learning Systems	Log and swiftly resolve platform, connectivity, and technical disruptions affecting ICT classes.	Issue tracking logs, escalation emails, and resolution logs
AI & Innovation Club	Plan, execute, and document enriched AI literacy, coding, and robotics club initiatives.	Club calendar, attendance sheets, and project portfolios
Departmental Coordination	Conduct regular departmental syncs, assign actionable tasks, and resolve pending blockers.	Formal meeting minutes and departmental action trackers
Continuous Improvement	Conduct periodic departmental self-evaluations to address gaps and reinforce strengths.	Departmental self-evaluation and audit reports

6. Class-wise and Level-wise Academic Priorities

Teaching content adheres strictly to the approved curriculum and developmental stages of students, avoiding redundant repetition and ensuring seamless progression from foundational literacy to advanced computational problem-solving.

School Level Grouping	Pedagogical & Academic Emphasis
Foundational & Junior Levels (Levels I – V)	Age-appropriate digital literacy, safe and responsible technology use, basic computer handling, creative digital art and typing, and introductory computational thinking puzzles as prescribed also Block Based Coding (ScratchJr and Scratch).
Upper Primary & Middle Levels (Levels VI – VIII)	Progressive digital productivity (spreadsheets, presentations), algorithmic logic, block-based programming transitioning to basic text-based programming (Python), and foundational concepts in Artificial Intelligence.
Secondary Levels (Levels IX – X)	Deep conceptual understanding of IT & AI, text-based programming, computational problem solving, data handling, digital ethics, cyber safety, and curriculum-aligned practical capstone projects.
Senior Secondary Levels (Levels XI – XII)	Specialized subject curriculum delivery (Computer Science / Informatics Practices), robust Python programming, SQL and relational database management, data visualization (Pandas/Matplotlib), CBSE practical records, and board exam preparation.

> **OPERATIONAL DIRECTIVE**
> *Implementation Mandate: The department maintains an independent Syllabus-Progress Tracker for each assigned class/level. Trackers record planned coverage, completed topics, pending content, practical coverage, and corrective interventions.*

7. Annual Action Plan: Key Departmental Priorities

7.1 Curriculum and Academic Delivery

Key Departmental Actions:

- Review the approved syllabus and academic guidelines for every assigned level.
- Maintain standardized annual/term-wise schemes of work and daily lesson plans.
- Regularly monitor completion rates of both theoretical and practical components.
- Review pending topics dynamically and adjust teaching plans in coordination with academic leadership.
- Ensure seamless continuity between classroom concept delivery, laboratory practice, and formal assessment.

Key Success Indicators: *Updated class-wise trackers, accessible lesson plans, documented progress reviews, and verified student practical work.*

7.2 Teaching Practices and Classroom Quality

Key Departmental Actions:

- Prioritise hands-on laboratory work and active computational learning.
- Incorporate live code demonstrations, guided student practice, and real-world problem solving.
- Embed competency-based learning principles and regular formative assessments.

- Encourage student participation, algorithmic reasoning, and code explanations.
- Conduct peer classroom observations and reflective educator assessments to refine pedagogy.
- Maintain documentation of effective teaching strategies using student work artifacts.

Key Success Indicators: *Relevant lesson plans, practical coding outputs, assessment logs, and observation feedback.*

7.3 Assessment and Student Learning Outcomes

Key Departmental Actions:

- Prepare comprehensive assessment blueprints, standard question banks, and rubric-based marking schemes.
- Conduct scheduled theory and practical examinations per school examination calendar.
- Perform granular post-exam performance analyses to identify skill gaps and common misconceptions.
- Provide constructive student feedback and structured remediation sessions.
- Assess student project portfolios and practical laboratory files systematically.

Key Success Indicators: *Complete assessment dossiers, documented performance analytics, feedback logs, and remediation records.*

7.4 Educator Coordination and Professional Development

Key Departmental Actions:

- Clearly define teaching assignments, laboratory allocations, and academic deliverables.
- Coordinate weekly meetings on syllabus coverage, practical pacing, and inter-class consistency.
- Identify educator training requirements in advanced programming, AI pedagogy, and educational technology.
- Conduct internal knowledge-sharing workshops and peer-learning demonstrations.
- Foster reflective teaching habits and documentation of best teaching practices.
- Monitor and track agreed professional development milestones.

Key Success Indicators: *Responsibility matrix, training attendance records, workshop minutes, and follow-up reports.*

7.5 Computer Laboratory and Digital Learning Readiness

Key Departmental Actions:

- Maintain up-to-date hardware, peripheral, and network inventory logs across all computer labs.
- Monitor system utilization, software licensing, and operational readiness for scheduled practicals.
- Verify system software configurations prior to practical examinations and daily classes.
- Maintain an immediate technical fault log recording network, hardware, or platform disruptions.
- Collaborate proactively with technical support teams for rapid issue resolution.
- Review system reliability trends to identify recurring technical bottlenecks.

Key Success Indicators: *Updated lab inventory, system logs, fault ticketing register, and resolution timestamps.*

7.6 AI & Innovation Club and Student Enrichment

Key Departmental Actions:

- Execute the structured annual institutional AI & Innovation Club calendar.
- Assign dedicated educator mentors across junior, middle, and senior school wings.
- Tailor innovation modules according to student interests, emerging tech, and school priorities.
- Organize activities covering AI literacy, Python scripting, robotics, UI/UX design, and web tools.
- Track student attendance, mentor evaluations, and milestone completion for club projects.
- Facilitate student participation in state, national, and inter-school hackathons and tech symposiums.

Key Success Indicators: *Club activity calendar, attendance logs, student project repositories, and competition achievement certificates.*

7.7 Departmental Review and Improvement

Key Departmental Actions:

- Hold bi-weekly departmental review meetings covering syllabus pacing, assessments, and lab health.
- Formulate action items with designated owners and stringent completion deadlines.
- Maintain an active Pending-Action Tracker for all academic and operational hurdles.
- Submit monthly and quarterly progress dossiers to the School Academic Leadership.
- Conduct evidence-driven SWOT analyses to uncover pedagogical gaps and operational needs.
- Update the departmental continuous improvement strategy according to review findings.

Key Success Indicators: *Formal minutes of meetings, active action tracker, leadership briefing files, and self-evaluation audits.*

8. Annual Activity and Review Calendar (2026–2027)

The operational schedule outlines departmental milestones across the academic year. Completed phases are verified via archival records, while ongoing/upcoming phases align with the institutional school calendar.

Time Period	Major Departmental Focus	Expected Tangible Output
April – June 2026	Initial annual planning, curriculum schematics, lab readiness checks, and departmental orientation.	Approved annual plans, lab audit records, and departmental meeting minutes.
July – September 2026	Curriculum implementation, practical learning delivery, Mid-Term assessments, and LEADS curriculum review.	Class-wise progress trackers, assessment dossiers, and curriculum implementation reports.
October – December 2026	Mid-session syllabus audit, AI & Innovation Club projects, winter assignment planning, and technical reviews.	Updated syllabus registers, club project submissions, and system fault audit reports.
January – March 2027	Curriculum completion, CBSE practical exams, final lab assessments, performance analytics, and remediation.	Final completion certifications, practical grade ledgers, and student gap remediation reports.
April 2027 Onwards	Comprehensive annual review, documentation of departmental achievements/challenges, and subsequent session planning.	Annual departmental evaluation report, resource requisitions, and 2027–2028 roadmap.

Review Rhythm: Curriculum pacing is audited bi-weekly; student learning outcomes post each testing cycle; and departmental priorities monthly.

9. Responsibility and Accountability Matrix

The Head of Department coordinates and monitors the action plan across all divisions. Individual ICT educators execute assigned academic, practical, and mentoring roles while maintaining verifiable departmental records.

Functional Area	Accountable Role	Mandatory Evidentiary Output
Overall Departmental Planning & Oversight	**HOD – ICT**	Annual action plan, periodic leadership reviews, and department performance reports.
Curriculum & Syllabus Progress Tracking	**HOD – ICT & Assigned ICT Educators**	Updated class-wise syllabus trackers and review verification minutes.
Lesson Planning & Classroom Delivery	**Assigned ICT Educators (Monitored by HOD)**	Comprehensive lesson plans, digital courseware, and student engagement logs.
Assessment & Learning-Gap Follow-up	**Assigned ICT Educators (Coordinated by HOD)**	Graded test scripts, diagnostic analysis rubrics, and remediation records.
Lab Readiness & Technical Maintenance	**Assigned ICT Educators, Lab Staff & HOD**	Lab inventory ledgers, hardware inspection sheets, and IT fault ticketing records.
AI & Innovation Club Implementation	**Designated Club Mentors (Under HOD Guidance)**	Annual club calendar, attendance registers, project repositories, and event reports.
Departmental Governance & Review	**HOD – ICT**	Formal meeting minutes, active action tracker, and executive summary reports.

10. Monitoring, Review and Reporting Framework

Departmental efficacy is evaluated strictly through tangible evidence rather than subjective assumptions. The institutional review relies on eight primary evidence streams:

- Class-wise syllabus trackers documenting theory and practical completion percentages.
- Comprehensive lesson plans and classroom observation feedback notes.
- Assessment registers, score distributions, and recorded learning-gap interventions.
- Student practical lab records, project repositories, and creative portfolios.
- Educator professional development certifications and workshop reflections.
- Computer laboratory asset logs, maintenance tickets, and downtime reports.
- AI & Innovation Club project achievements, hackathon participation, and attendance files.
- Formal departmental meeting minutes and the real-time action-item tracker.

Corrective Protocol: In any instance where a planned milestone is delayed, the department immediately logs the underlying cause, outlines an explicit corrective intervention, assigns a responsible educator, and establishes an escalated review deadline.

11. Departmental Commitments for the Academic Session

11.1 Planned Academic Delivery: Maintain absolute transparency and discipline in curriculum planning and timely delivery across Levels I–XII.

11.2 Practical Competence: Guarantee that computer science instruction prioritizes active, practical application over mere theoretical rote learning.

11.3 Evidence of Learning: Rely on verified student coding samples, project deliverables, and objective assessment rubrics to measure learning outcomes.

11.4 Teaching Improvement: Foster innovative, student-centered, and inquiry-based pedagogy throughout all computer labs and classrooms.

11.5 Educator Development: Identify individual teaching development areas and actively support continuous pedagogical and technical growth.

11.6 Reliable ICT Facilities: Uphold high standards of laboratory cleanliness, system performance, software readiness, and cyber hygiene.

11.7 Responsible Innovation: Empower students to explore emerging AI and computational technologies thoughtfully, creatively, and ethically.

11.8 Accountable Governance: Maintain clear roles, robust documentation, transparent meetings, and swift resolution of pending matters.

11.9 Continuous Improvement: Use data and student performance metrics to systematically address weaknesses and scale departmental strengths.

12. Conclusion

The ICT Department's Annual Action Plan establishes an integrated, accountable framework governing curriculum delivery, hands-on lab learning, performance evaluation, educator development, infrastructure maintenance, and technology innovation. Its success will be reflected in student computational mastery, ethical digital engagement, and consistent departmental execution.

Through rigorous evidence-based tracking and continuous pedagogical refinement, the department remains steadfast in its dedication to upholding academic excellence at Green Valley Educational Institute.
